

Sample email text:

We are offering you access to a tool called the SuperStrong® assessment on the VitaNavis® platform to help you begin your career exploration journey.

Why should you try this experience? In 10 minutes or less, you'll be on your way to exploring career paths based on your unique interests. The assessment then helps map your specific interests to careers that you can further explore. Research shows that when you follow a path you are interested in, you are likely to be more successful.

You will have free access to explore:

- Your top career matches and programs available on campus to help you figure out a major
- Salary ranges (that you can search by location) for specific careers
- Skills Builder to help you understand the skills you've acquired through volunteer or jobs you've had, and rate these to help you figure out what areas to further develop as you prepare for the workforce
- Career Pathways which help you find information on different careers and occupations such as skills needed, job details, requirements, videos, and more
- Resume Builder which helps you build out different resumes based on jobs you are looking at applying for

To access the assessment and the tools on the platform, you'll need to create an account. Follow the link below to get started:
